Application/Control Number: 10/604,993

Art Unit: 3764

Upon further consideration it has been determined that allowability of the claims as previously presented in the office action of 11/09/07 was improper.

The indicated allowability of claims 3, 9, 10 and 11-20 are is withdrawn in view of the newly discovered reference(s) to Rawlings and Wallner. Rejections based on the newly cited reference(s) follow.

Claim 3 is allowed.

Claims 12-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 2, 6, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Downs in view of Walker and Rawling.

Downs discloses a device comprising a band/belt means defining upper and lower openings for a users waist and hips, thigh cuffs, elastic cables (12) and a channeling means.

Downs however does not show his device wherein his band/belt/girdle and thigh cuffs have a frustro conical shape.

Wallner teaches a device wherein the cuffs of his device have a frusctro conical shape and Rawling teaches a device wherein it has a frustro-conical shape (see fig. 2).

Application/Control Number: 10/604,993

Art Unit: 3764

Given the above combined teachings, the examiner notes that it would have been obvious to one of ordinary skill in the art to manufacture the user engagement components to fit the natural muscle-skeletal shape of a user's body, and thereby securing the components of the device to the body.

In regard to a further limitation present in claim 11 which has not been presented in earlier claims. The examiner notes that to manufacture which are comfortable and are required to snugly fit the body during exercise is known. Note multiple lays (1c) (1) and 16 of Rawling. The examiner considers providing multiple fabric layer as part of a securing garment as obvious in view of Rawlings.

In regard to claim 11, the examiner suggest further defining the extensions/soft lining material (as claimed in claim 3) wherein said extension connect said girdle to said cuffs.

Claims 1-2 and 4-8 rejected under 35 U.S.C. 103(a) as being unpatentable over Adele suit Euro Med. In view of Walker and Rawling.

Adeli suit Euro Med. discloses the device of claims 1-2 and 4-8 substantially as claimed absent his band/belt/girdle and thigh cuffs having a frustro conical shape.

Walker teaches a device wherein the cuffs of his device have a frustro conical shape and Rawling teaches a device wherein its shape is frustro conical (see fig. 2).

Given the above teaching the examiner notes that it would have been obvious to one of ordinary skill in the art to manufacture the device of Adeli suit Euro Med wherein his user engagement members of frustro conical, so as to conform to the natural shape of the human body.
